Education

University of Makati

Bachelor of Science in Computer Science Major in Application Development

JP Rizal Extension West Rembo, Taguig City

2022 – 2026

Pitogo High School

Science, Technology, Engineering, and Mathematics

Negros St., Makati City

2021

Internship Experience

Inspire Holdings Incorporated

Software Developer Intern

Uptown Bonifacio, BGC, Taguig City

2026

Loopwork V1 Website

Technologies: Nest.js, Next.js, Firebase

Backend

Refactored and optimized pre-existing Nest.js APIs for core Schedule and Document Management features, diagnosing and fixing complex architectural bugs to improve system uptime and overall performance.

Loopwork V2 Website and Mobile

Technologies: Nest.js, Next.js, Supabase, ExpoGo, EmailJS

Backend

Scaled backend architecture for Project Management modules and integrated third-party communication APIs using EmailJS to support seamless contact support functionality across both web and mobile platforms.

Technical Skills & Academic Projects

ForeRent (Rental Property Management System)

Technologies: PHP, HTML, CSS, JavaScript, Laravel, Visual Studio Code, Docker, MySQL

Researcher, Tester, Business Analyst

2024 – 2026

Performed comprehensive system analysis and managed all documentation requirements for both the academic institution and the client, ensuring accuracy, consistency, and proper alignment of all technical reports and academic papers.

Ready, Seat, Go (Seat Reservation System | Website and Mobile Application)

Technologies: Java, HTML, CSS, JavaScript, CodeIgniter, Android Studio, Visual Studio Code, MySQL

Frontend, Backend

2024 – 2025

Engineered backend functionality for the web platform, architected the centralized database schema, and synchronized the web and mobile data streams. Integrated automated One-Time Password (OTP) delivery using Mailjet for enhanced user authentication security.

The Merchant's Seeker (Object Finding Mobile Game)

Technologies: C#, Unity

Backend

2024 – 2025

Implemented backend gameplay systems to handle core game logic, dynamic object interactions, and progression rules, ensuring smooth and reliable application performance.

PillFluence (Mobile Medication Tracker)

Technologies: Java, Android Studio

Frontend, Backend

2023 – 2024

Developed core application functionalities and incorporated automated One-Time Password (OTP) notification delivery via Mailjet to reinforce secure user login protocols.

DelveSense (Library Management System)

Technologies: C#, Tool: Microsoft Visual Studio 2022

Frontend, Backend

2023 – 2024

Programmed complete backend logic and structured database storage using Microsoft SQL Server to guarantee highly efficient data indexing, rapid retrieval, and stable operational workflows.

Other Project

A Web-Based Training System for Stance and Form Using MediaPipe Pose Estimation

Technologies: Python, scikit-learn, OpenCV, Visual Studio Code, Google Colab

2025

Explored machine learning methodologies by training domain-specific datasets and applying automated pose estimation using MediaPipe. Leveraged scikit-learn and OpenCV to execute data preprocessing and model evaluation.

Organization

CCIS Student Council

Creatives and Marshall Committee

JP Rizal Extension West Rembo, Taguig City

2022 – 2023

Recognition/Achievements

BlackStride Cyber

Intro to Cloud Security, Compliance, and Identity

August 01, 2026

Certiport

IT – Specialist Databases

December 05, 2025 – December 05, 2030

University of Makati

Dean's Lister

JP Rizal Extension West Rembo, Taguig City

2022 – 2026

University of Makati

Hackathon Participant 1st Runner Up

JP Rizal Extension West Rembo, Taguig City

2024

Pitogo High School

With Honors

Negros St., Makati City

2021
